How to Set the Cap's Bill

The bill has a pressed foam insert. It may be bent as you prefer. To set the bill so it will retain the bend longer, perform the following steps.

WET METHOD

- Wet the bill with cold water.
- Bend the bill into the desired curve.
- Tie a string around the bill to secure the bend. To minimize getting a string impression on the bill, place a colorfast washcloth around the bill first and then tie the string around the bill.
- Let the bill air dry. Remove the string. Press as desired and the cap is ready to wear.

OR

HEAT METHOD

- Bend the bill into the desired curve.
- Tie a string around the bill to secure the bend. To minimize getting a string impression on the bill, place a colorfast washcloth around the bill first and then tie the string around the bill.
- Using a hand hair dryer, warm the bill for about 1-2 min.
- Let the bill cool. Remove the string. Press as desired and the cap is ready to wear.
